

Finance Access Control Policy

FINANCE ACCESS CONTROL POLICY

Effective Date: January 1, 2025

Version: 2.1

1. ACCESS CONTROL

Only Finance employees may access the payroll processing system.

All payroll data is encrypted at rest and in transit.

The payroll application is only accessible from the internal corporate network.

Only the VP of Finance can approve payroll runs.

2. SYSTEM ACCESS

Production databases are not internet accessible.

All administrative access requires multi-factor authentication.

Database access is restricted to database administrators only.

SSH access to production servers is restricted to the infrastructure team.

3. AUDIT AND COMPLIANCE

All access to financial systems is logged and monitored.

Security reviews are conducted quarterly.

Access permissions are reviewed on a monthly basis.

All configuration changes must be approved by the security team.

4. BACKUP AND RECOVERY

All financial data is backed up daily.

Backup data is encrypted using AES-256.

Backups are tested monthly to ensure recoverability.

Offsite backup storage is maintained at a separate geographic location.

5. NETWORK SECURITY

The finance network segment is isolated from other network segments.

No external access is permitted to the finance application.

All network traffic is inspected by the intrusion detection system.

Security groups restrict access to only required ports and protocols.
